Mask PN: 80040003v1, 80040003v1D,
80040003v2, 8004003v2D, 8004003v3,
8004003v3D

Dear Customer,

You have purchased a high quality Face Mask with a number of special characteristics. The materials are silver-plated using a special procedure that involves anchoring silver onto the product fibers by ion exchange. Shade, color differences, and discolorations are NOT manufacturing faults and are part of the normal look of this specialized product.

To ensure the product retains functionality even after washing, please observe the following care instructions:

Washing: Gentle wash using a gentle powder or liquid that does not include bleach. The mask can be washed in a home washing machine at a temperature of 30°C/86°F more than 50 times without any alteration in its specified characteristics. **Do not use disinfectant, cleaning products that contain chlorine, or any fabric softeners!** Likewise, dry cleaning will permanently damage the product.

Bleaching: As mentioned above, **Please do not use chlorine.** The silver coating will be damaged by chlorine and will lose important function.

Tumble Dryer: Use a gentle setting, as the surface of the product can be destroyed by direct contact with high heat.

Ironing: Iron at low temperature without the use of steam.

30° C No Chlorine Bleach Low Dryer Heat No Dry Cleaning Low Iron Heat

The manufacturer does not accept any liability for damage/injuries incurred as a result of improper handling of incorrect use. We recommend that customers wash according to the instructions above specifications. Please note that the surface resistance of the product may change based on the individual's sweat composition or medications. The manufacturer will accept no liability for this.
