NEWARK, NEW YORK, July 29 - V Technical Textiles, Inc. the world’s leader in RF and EMI Shielding Enclosure fabrication, is attending the premier Symposium in our field this year despite COVID-19 not being under control. While this meeting is usually a “road trip” for us, this year we will attend in a very appropriate and socially distant fashion. Steve Frierson will be watching the great technical program on remote feeds from various “virtual” platforms and be able to tour the sponsor’s “virtual booths” and see many more tutorials and workshops covering the hot topics in Electromagnetic Compatibility, Signal Integrity, and Power Integrity, which is what we are all about at V Technical Textiles, Inc. There will also be 200 peer reviewed papers and technical meetings, which include Technical and Special Committees, along with an extensive program of Standards and Continuity groups than he would have been able to fit into the usual week-long meeting. That’s because the symposium is available from August 3-28, 2020, allowing a much more relaxed pace than a standard meeting. The big missing ingredient is the “personal touch” of seeing our colleagues in person and catching up with each other. Hopefully, we will resume normal meetings next year and see each other in person! Enjoy the Symposium, Learn Things, and Stay safe!

Located in Palmyra, New York, V Technical Textiles, Inc. is the leading manufacturer of RF Shielding and EMI enclosures and tents. Our benefit is our flexibility; with our metalized fabric enclosures being lightweight, portable, custom made, and providing unparalleled shielding performance.
