VTT to “Attend” IEEE EMC + SIPI Virtual Symposium in August

COVID-19 won’t Stop Us from Learning and Providing Valuable Industry Knowledge

NEWARK, NEW YORK, July 9 -V Technical Textiles, Inc. the world leader of RF Shielding and EMI Enclosure fabrication, will **NOT** allow COVID-19 to stop us from attending the premier Symposium in our field. While this meeting is usually a “road trip” for us, this year will be spent watching the technical program on remote feeds from various “virtual” platforms and being able to tour the various sponsor’s “booths” and see various tutorials and workshops covering the hot topics in EMC, Signal Integrity, and Power Integrity along with 200 peer reviewed papers and technical meetings, which include Technical and Special Committees, along with an extensive programs of Standards and Continuity groups. The symposium is available from August 3-28, 2020, the big plus being allowing a little more of a relaxed pace than a standard meeting, but also sadly lacking the “personal touch” a live meeting gives. Hopefully, we will resume normal meetings next year. Stay safe!

Located in Palmyra, New York, V Technical Textiles, Inc. is the leading manufacturer of RF Shielding and EMI enclosures and tents. Our benefit is our flexibility; with our metalized fabric enclosures being lightweight, portable, custom made, and providing unparalleled shielding performance.
