VTT WISHES EVERYONE A SAFE AND HAPPY HOLIDAY SEASON!

Finding Joy during this Season of Hope!

NEWARK, NEW YORK, December 21 -V Technical Textiles, the world leader of RF Shielding and EMI Enclosure fabrication, wishes everyone a Happy Holiday Season. Certainly, it has been a different kind of year with the Corona Virus Pandemic that has affected our world and caused great sadness and loss of life. Our lives, family, education, and work have all been changed as we battle the spread of this disease. We found ways around the disease, our meetings became “virtual”, and while we miss the face-to-face meetings with our customers and colleagues who work in our field, we found a way to meet differently. Our company was able to retool and provide masks, protective garments, surface wipes and coverings that could be used to aid our front line workers in the battle against COVID19. This virus has proved to be a difficult foe to overcome. The release last week of a vaccine that should control the spread of this virus only increases our hope for better things to come in 2021. We need to continue to work together to protect our future. Enjoy this Season **SAFELY** and **VIRTUALLY** with family and friends as we all prepare for the start of a more **NORMAL** New Year!!

V Technical Textiles, Inc. is **ALWAYS** working on new products and has continued to develop innovative solutions within our Industry, entering into new two partnerships in 2020 with ETS Lindgren of Cedar Park, Texas and the Seaman Corporation of Wooster, Ohio that will make our products even better! We thank all of our customers for their continued patronage and trust and will continue to help them with their varied RF/EMI shielding needs, conductive metalized textile needs, and shielding garments.

Our Best to All in 2021!
