VTT WISHES EVERYONE A HAPPY NEW YEAR IN 2021

Hoping for a Great Year in 2021!

NEWARK, NEW YORK, December 31 -V Technical Textiles, the world leader of RF Shielding and EMI Enclosure fabrication, wishes everyone a Happy New Year in 2021. 2020 was a challenging year, but on a positive note, it reminded us of our ability to be creative and work together to handle the massive challenge that the COVID19 threw at us. We are now rounding the corner on the Pandemic. As we all prepare for the start of a New Year, we have to look back and see some of the great things that happened in 2020 that will lead to a better 2021!!

We learned in 2020 that **we are better when we work together** to solve difficult issues, each of us bringing our special strengths to the table to make better products together.

We entered into a partnership with ETS Lindgren of Cedar Park, Texas, who will bring their line of excellent rigid shielding products to us for distribution, ultimately increasing and complimenting our current line of textile based shielding solutions.

We also entered into a partnership with the Seaman Corporation of Wooster, Ohio, a company well known for their fabric coatings and look forward to our new ruggedized fabric product launches that will be the result of this partnership.

V Technical Textiles, Inc. is **ALWAYS** working on new products and is working to develop innovative solutions within our Industry. We thank all of our customers for their continued patronage and trust and will continue to help them with their varied RF/EMI shielding needs, conductive metalized textile needs, and shielding garments. We look forward to the launch of several new shielding solutions in 2021!

Our Best to All in 2021!
