***Wireless/IoT/5g Concerns-How V Technical Textiles, Inc. can help Companies cope with the
“Waves”!***

NEWARK, NEW YORK, September 15-V Technical Textiles, Inc.’s General Manager, Shawn DeCook, will present at the **EMC LIVE Wireless/IoT/5G Event on September 21, 2021 at 2:15 PM EDT**. Wireless and solid-state devices, along with the devices of the IoT, are all or partly affected by EMI and RF frequencies. Whether they emit or receive signal, new electronic devices are subject to compliance with enforceable standards for emissions, susceptibility to emissions, and immunity to emitted RF radiation in order to be certified for sale.

V Technical Textiles, Inc. manufactures RF Shielded EMC Testing enclosures used in the certification testing process to ensure compliance with applicable standards for EMC certification, develops shielding solutions to help manufacturers to meet EMC compatibility requirements, and designs devices and protective equipment for personnel working in high RF exposure jobs. VTT also provides RF Shielded Garments for those concerned about ever-increasing RF Exposure in today’s Electronic World!

Shawn DeCook, with 30+ years of experience in manufacturing and product development, leads the VTT Teams servicing the aerospace, automotive, wireless, and textile industries. These specialized teams design and develop RF Shielded EMC Testing Enclosures, as well as provide RF/EMI Shielding solutions which work to make the components of Wireless/IoT/5G Industries EMC Compliant, ensuring that they can work together at maximum efficiency.

Mark your calendar and REGISTER TODAY for EMC LIVE Wireless/IoT/5G!!
